SOPHISTICATION IN MOTION.

With its wide stance and on-point design cues, the 2018 Taurus makes a powerful statement. It is designed to respect your comfort and respond to your needs.

The standard 3.5L engine provides plenty of power and torque for this 5-passenger full-size sedan. To help you stay poised through the corners, even when accelerating, there's standard Torque Vectoring Control.² The system applies slight braking force to the inside front wheel as needed to help more torque reach the road and keep Taurus firmly planted.

Keep on track through sharp turns with standard Curve Control.² When it senses you're taking a curve too quickly, the system can slow Taurus by as much as 10 mph in about a second to help maintain control. Plus, all-wheel drive (AWD)³ balances torque between the front and rear wheels to enhance handling and traction. The 2018 Ford Taurus is designed for maximum agility.

READY TO ASSIST.

IN TRAFFIC

Adaptive cruise control & forward collision warning with brake support¹ can adjust the speed of Taurus to maintain a preset gap from the vehicle in front of you. If a potential collision is detected, the system can visually and audibly alert you, and pre-charge the braking system to help provide full responsiveness when you brake.

BETWEEN THE LINES

Drifting out of your lane? The Lane-Keeping System¹ can help. By applying steering wheel torque, and even alerting you with steering wheel vibration, it helps direct you to return to your lane.²

CHANGING LANES

WHEN PARALLEL PARKING

Active park assist¹ is a beauty to behold. It not only assists you in finding a spot, it steers you into it while you control the accelerator, brake and gear shifter as needed.

KEEPING THINGS STABLE

Standard on every Taurus, AdvanceTrac[®] electronic stability control helps reduce skidding and fishtailing, which is beneficial in various kinds of inclement weather.⁴
