Advanced technology at your command

Optima connects you to life-enriching conveniences of modern driving, including communication, data, and entertainment. All this intuitive technology is efficiently organized and designed to make sure you are connected and informed, enhancing your confidence while driving and helping to keep you focused on the road.

A wiser state of mind

The driver’s state of mind was essential in the development of Kia Drive Wise — a suite of available driver-assistance technologies. Its features are intended to keep you alert, calm, and aware of surrounding traffic, and intervene if necessary to help you avoid collisions.

1. UVO — SHORT FOR “YOUR VOICE”TM
   The UVO eServices Infotainment System provides you with an easy, hands-free way to integrate a compatible smartphone™ with your Optima. UVO can keep track of your vehicle’s parking location with Parking Minder™ or monitor your vehicle’s driving habits, access Drive Connect™ or Enhanced Roadside Assist™ and check maintenance requirements with Vehicle Diagnostics™ on the large touchscreen. Additionally, there are no subscription fees for the first 10 years to access all of these benefits.

2. SMART TRUNK™
   Available Smart Trunk opens when you simply stand within a few feet of it for three seconds with the available Smart Key™ in your possession. This is especially appreciated when you have your hands full.

3. SMART VIEW™
   Optima’s available Smart View opens when you simply stand within a few feet of it for three seconds with the available Smart Key™ in your possession. This is especially appreciated when you have your hands full.

4. UVO eSERVICES APP™
   An available app, downloadable at the Apple Store® or Google Play™ Store, lets you use a compatible smartphone™ to access UVO eServices features. Or, use a computer to access UVO eServices through MyUVO.com.

5. AUTONOMOUS EMERGENCY Braking™
   Available Autonomous Emergency Braking™ uses radar to automatically slow or stop your Optima when appropriate to help you avoid collisions.

6. SURROUND-VIEW MONITOR™
   Available Surround-View Monitor utilizes four cameras located at the front, rear, and sides to provide a view around the vehicle. This helps enhance driver visibility when maneuvering into parking spaces.

7. APPLE CarPlay™
   Apple CarPlay™ and Android Auto™ let you take full advantage of the UVO eServices Infotainment System by connecting your compatible smartphone™ with a USB cable. You can then use it to navigate to your destination, make phone calls, retrieve text messages, and respond to them verbally, and more. Plus, compatible apps are displayed on the touchscreen.

8. BLIND-SPOT DETECTION WITH LANE-CHANGE ASSIST™
   A standard radar system helps detect vehicles in the driver’s blind spot and then provides audible and visual alerts. Lane-Change Assist helps detect vehicles in adjacent lanes approaching from behind.

9. REAR CROSS-TRAFFIC ALERT™
   This available system is designed to monitor vehicles and pedestrians traveling behind you. When it detects a vehicle, it alerts the driver with a combination of audible and visual warnings.

10. LANE DEPARTURE WARNING™
    This available system is designed to alert the driver when the vehicle moves out of its lane without the turn signal being used. When it detects a lane departure, it helps alert you using a combination of audible and visual warnings.

11. FORWARD COLLISION WARNING SYSTEM™
    A standard radar system helps detect vehicles in the driver’s blind spot and then provides audible and visual alerts. Lane-Change Assist helps detect vehicles in adjacent lanes approaching from behind.

12. REAR PARK ASSIST SYSTEM™
    When parking, the standard rear-sensor system is designed to give an audible warning if it detects certain objects close to your vehicle.

13. DYNAMIC BENDING LIGHT & HIGH-BEAM ASSIST™
    Available LED headlights with Auto-Leveling and Dynamic Bending Light automatically adjust the level of projection and pivot to follow the curves of the road to enhance visibility. Additionally, available High-Beam Assist automatically dims the lights for oncoming traffic or engages the high beams when the road is clear.

14. ADVANCED SMART CRUISE CONTROL™
    Available Advanced Smart Cruise Control uses radar to automatically slow or accelerate your Optima when appropriate to track with the vehicle ahead.
With Optima, exhilaration is standard. Designed to deliver strong acceleration instantly at your command, Optima’s three Gasoline Direct Injection (GDI) engines, two of which are turbocharged, offer remarkable performance. Choose between the 7-speed Dual-Clutch Transmission (DCT) or, for an even sportier driving experience, the available 6-speed Sportmatic® transmission.* Every model also features suspension systems engineered to provide you with precise, responsive handling and a smooth, quiet ride.

**Exhilarating performance**

### PERFORMANCE

**OUTSTANDING PRECISION**

All Optima GDI engines, from the 185-hp 2.4L to the available 178-hp 1.6L Turbo and 245-hp 2.0L Turbo, deliver strong acceleration and truly inspiring performance.

**SMOOTH, PRECISE HANDLING**

A refined four-wheel independent suspension features high-performance dampers, front MacPherson struts, and a rear multi-link design for a smooth ride and precise handling.

**DRIVE MODE SELECT SYSTEM**

To suit your style of driving, Drive Mode selectable electronic steering and powertrain control allows a choice of Normal, Eco, or Sport settings.

**7-SPEED DUAL-CLUTCH TRANSMISSION**

The available 1.6-liter turbocharged GDI engine* is paired with a 7-speed Dual-Clutch Transmission (DCT). The DCT system instantly engages and disengages gears to optimize the engine’s responsiveness.

**SPORTOMATIC® TRANSMISSION**

An available 6-speed Sportmatic® transmission allows you to choose automatic mode or, for a sportier driving experience, manual-shift mode. It includes preset shift patterns for specific conditions like uphill, inclement weather, or performance driving.

**ISO-STRUCTURE™ CONSTRUCTION**

Optima features a uniquely engineered body that combines various high-tensile strength steel alloys. This body structure helps improve driving dynamics for more precise handling and is the foundation for a quieter ride.
VEHICLE STABILITY MANAGEMENT (VSM)
For additional steering-direction-control capability, the VSM system is designed to intervene in appropriate situations to help the driver regain control of the vehicle.

ELECTRONIC STABILITY CONTROL (ESC)
ESC provides improved directional stability to help maintain better control in difficult driving situations. During emergency maneuvers, it works to control the engine and brakes to help keep your Optima on course.

TRACTION CONTROL SYSTEM (TCS)
When TCS senses wheel slip during vehicle acceleration, it uses a combination of both engine power and brake force to help transfer power to the wheel that has more traction.

ELECTRONIC BRAKE-FORCE DISTRIBUTION (EBD)
To help maintain more consistent braking as vehicle loads and weight distribution change, the EBD system automatically adjusts the front-to-rear balance of brake pressure.

BRAKE ASSIST SYSTEM (BAS)
If BAS detects emergency braking, based on how quickly you step on the brake pedal, it applies full braking force, which can help shorten your overall stopping distance.

HILL-START ASSIST CONTROL (HAC)
When starting off on a steep hill, HAC automatically holds the brake pressure for two seconds after you take your foot off the brake pedal.

ANTI-LOCK BRAKING SYSTEM (ABS)
ABS is the foundation of an active safety system and can help contribute to driver confidence. The system can help provide greater vehicle control when stopping in difficult conditions like wet or slippery roads.

Dedicated to making safety a top priority

Optima’s technologically advanced systems are engineered to give you greater confidence on the road and help you maintain control, even in harsh road conditions and in some emergency situations. In addition, these systems are designed to function automatically, leaving you free to focus on safe driving.
Advanced engineering for your peace of mind

At Kia, the process of improving all aspects of safety is relentless. As a result, continuous engineering advances and breakthroughs in material design have led to Optima’s exceptionally strong body construction, strategically placed airbags, and advanced sensors, all of which help to increase your peace of mind.15

PASSIVE SAFETY

ADVANCED AIRBAG SYSTEM
An advanced airbag system helps protect driver and passengers with dual front, front seat-mounted side, and full-length side curtain airbags and is complemented by a driver’s knee airbag.15

AIRBAG & SEAT-BELT SENSORS
This advanced system monitors the severity of certain impacts, the presence of a front passenger and seat-belt use, and then controls airbag inflation accordingly.15

FRONT SEAT-BELT PRETENSIONERS
Pretensioners are designed to tighten the front seat belts in the event of certain collisions. This can help to reduce the likelihood of injuries.

HEIGHT-ADJUSTABLE SEAT-BELT ANCHORS
The height-adjustable seat-belt anchors allow the driver’s and front-passenger’s seat belts to be raised and lowered for a proper fit, helping ensure effective operation.

FRONT & REAR CRUMPLE ZONES
Both front and rear crumple zones are engineered to help absorb and dissipate impact energy, helping to preserve the basic structural integrity of the passenger compartment in certain collisions.

SIDE-IMPACT DOOR BEAMS
All doors are reinforced with steel beams to help absorb impact energy and deflect side-impact force. The body’s support pillars are reinforced to help strengthen the body of the vehicle.

REAR CHILD-SAFETY DOOR LOCKS
Rear child-safety door locks help prevent the doors from being opened accidentally, which is important when small children are passengers. With the doors in the locked position, they can only be opened from the outside.

LATCH SYSTEM
Optima features the easy-to-use Lower Anchors and Tethers for Children (LATCH) system. It is engineered to let you securely install a compatible child seat at either end of the rear seat.

FRONT & REAR 3-POINT SEAT BELTS
Three-point seat belts are standard for all seating positions, so that each person is protected with an over-the-lap and shoulder seat belt.
